Choosing the Right Chip Color for Your Garage

Five of our chip colors are great choices—Emerald hasn't been very popular. We can produce any color, but our stock colors are more affordable and available for immediate installation, while custom colors require a two-week delivery.

Questions to Ask Yourself:

- Is your color palette gray or tan?
 - Choose Morocco for a tan palette.
 - Any of the other four colors work for gray palettes.
- How will you use your garage floor?
 - Family-use garage? Choose a chip blend with black—it makes the floor pop and hides dirt.
 - Not planning to keep it spotless? Go with a blend that includes black.
 - Workshop or tinkering space? Choose Indianapolis—it has no black, making it easier to spot small dropped items.

February Special: Save \$500!

Integrity Garage Floors' Dedicated Foreman

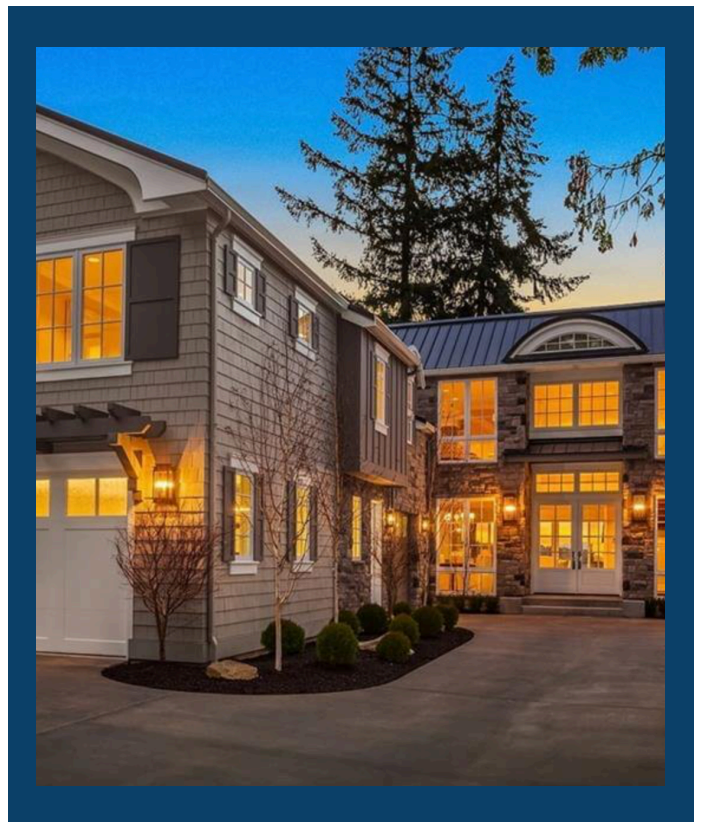

Javier Garcia has been the Foreman at Integrity Garage Floors for four years, bringing expertise and leadership to every project. Originally from Mexico, he moved to the U.S. in 2003 and has built a strong reputation for quality and dedication. Outside of work, Javier is a devoted father of three. His weekends are filled with soccer games for his 13-year-old son and 9-year-old daughter, while the off-season brings family hikes to Mt. Rainier or movie nights at home. A fun fact—he and his daughter are both leap year babies, sharing a February 29th birthday!

Company Spotlight: Overbrook Construction, Inc.

For over 30 years, Overbrook Construction, Inc. has been crafting high-quality homes throughout the greater Eastside and Seattle areas. Specializing in luxury new construction, additions, and renovations, their expert team ensures a seamless process from concept to completion. Founder Eric Whiting takes pride in the company's strong relationships with clients, suppliers, and employees. With a reputation built on trust and referrals, Overbrook continues to deliver exceptional craftsmanship and service.
